Internet Filtering for Schools and Universities

Cloud Technology

Flash-Start Cloud is a Content Filter and Malware mitigation service for every kind of School and University. Provided as a Cloud service it requires no hardware or software. Just connect to your network (LAN or wifi) and your web surfing will be safe.

Benefits for the Schools

- Filters and protects students from Internet dangers and cyberbullying.
- Protects from legal risks linked with illegal goods available on the web (eg software piracy, counterfeit goods).
- Blocks access to infected sites such as ransomware to avoid theft or computer hijacking for Botnet attacks.

Opportunity for Resellers

- Channel based selling is the only sales model
- Guarantees a constant revenue over time (SaaS model)
- Professional Support provided for 24 x 7 x 365

Complete Solution for Filtering
